

EPILEPSY ALLIANCE EUROPE

Working to make epilepsy a healthcare priority in Europe

under the auspices of:

NEWS FROM THE CO-CHAIRS

October 2016

LAUNCH OF EpilepsyAllianceEurope.org

Over the past six months we have been working to build a new website for the alliance, with the aim of creating a space to serve as a window to the world to promote the work of Epilepsy Alliance Europe, its structure, membership and working methods, the activities we are planning, our collaborations and partnerships, as well as reporting EU-related news.

PROGRAMS

Above all, the website announces to the epilepsy world that we are 'open for business'! It does so by highlighting the programmes in which we are involved at present, including:

- E-PILEPSY
- ESBACE
- EpiCARE
- EPITARGET
- RADAR-CNS
- EBC - Value of Treatment:

MEP WORKING GROUP

The European Advocates for Epilepsy working group in the EU Parliament has a dedicated section on the site, to recognise the consistent support the

55-member strong MEP group lends to people with epilepsy and those who care for them, by hosting our events in the parliament and supporting our efforts to increase funding for epilepsy research in EU funding programmes.

NEWS

News blogs will feature breaking news stories on Epilepsy Alliance Europe activities as well as news from the wider epilepsy community.

LOGO

As part of the redesign process, we also developed a new logo for Epilepsy Alliance Europe, which is a simpler cleaner design than the previous version.

Redesigning the website has been a long and, at times, slow process but we are very pleased with the final result. We would like to thank Ann Little and Denis McEvoy for their work in bringing it to fruition. We hope that you will like it too!

With best wishes

Athanasios Covanis and Philippe Ryvlin
